

THE RELEVANCE OF THE UPBRINGING OF YOUNG PEOPLE IN THE SPIRIT OF MILITARY PATRIOTISM

Mustayev Ruslan Damirovich

Faculty of Military Education, Fergana State University

Isafov Samandar Shavkatbek o'g'li

Fergana State University Cadet of the Faculty of military education

Anotation: *this article is briefly covered today that raising young people in the spirit of military patriotism is an issue that cannot be delayed. Patriotic education of the younger generation has always been one of the most important tasks of the modern educational system, since childhood and adolescence are considered the most optimal period for the formation of a feeling of love for the motherland.*

Keywords: *globalization,, military-patriotic, topical, law "on state policy on Youth", feature, in the armed forces, in defense, concept, of the soldier.*

In today's era of globalization and sharp competition, armed conflicts and confrontations, new threats and risks that are taking place in different corners of the world's soldier's g, including our region, are setting up urgent tasks that cannot be delayed in front of us.

It is in such conditions that the youth of our country, including patriotism, are brought up in the spirit of military-patriotic high spiritual and moral values , deeply instilling in their minds the need to preserve peace and harmony as tears, "the people and the army are one body, one soul!"on the basis of a noble idea, it is required to combine the strength and capabilities of ministries and departments responsible for youth education on the basis of one idea, one goal.

In 2023-2027, the concept of educating youth in the spirit of military patriotism (next-the concept) was developed on the basis of the Constitution of the Republic of Uzbekistan, the law of the Republic of Uzbekistan "on state youth policy", decrees and decisions of the president of Uzbekistan, decisions of the Government of Uzbekistan and provides the basis for the development of

In general, patriotism is a concept that expresses the love and loyalty of people to their native land, to their own oshion. Patriotism is one of the universal feeling, spiritual values, common to all people, people, Nations, polished for centuries. Historically, patriotism is also a set of emotions that have been improved in the process of Social Development, the struggle of people for the inviolability and independence of the territory in which they live, related to the fate of their homeland: It is manifested in pride in the past and present of the motherland, in the protection of its interests. It was not for nothing that the love of the motherland is from faith.

Patriotic people are much more common in our homeland. For example, Abdullah Avlani, even though he lived during the years of repression, freedom of speech was very developed in him. Mahmudhaja Behbudi, he is known in our homeland for his children's education books. His work on teaching children a foreign language, making baskets and other teaching is worthy of distribution. The "work of the invincible power of high morale" of our first president also provides very much comprehensive information about the contributions that our ancestors made for their native lands-for example, the opposition to the tyranny of Genghis Khan Amir Temur courage Jaluddin Manguberdi and other great warlords.

The main task of military patriotic education is to develop in every way a sense of pride, love for the Armed Forces, loyalty to our combat and labor traditions, respect for military labor, the formation of freedom and independence, constant readiness for protection with weapons in our hands, fulfilling our own civil duty.

The problem of patriotic education of the growing younger generation and reaching adulthood as a mature citizen is one of the important tasks facing our state and society. The rapid volatility of the political situation in the world, the peculiarities of socio-political life, our state demand an inexhaustible increase in defense capabilities, systematic preparation of the younger generation for the defense of the motherland.

Raising young people in the spirit of military patriotism, respect for our national traditions and values, raising a spiritually mature and physically healthy harmonious generation, reliably protecting their rights and interests, interest and active participation of young people in military service in large-scale reforms in the Armed Forces is one of the most important urgent tasks of today.

Patriotic education is a complex and multifaceted activity in its nature. As one of the most important values of society, it covers social, political, spiritual-moral, cultural, historical and other characteristics within its content.

Being an expression of a person's high emotional-spiritual attitude to his homeland, patriotism is a component of a person's spiritual wealth. True patriotism always manifests itself as an integral unit of spiritual, civil responsibility and social activity of a person and serves as a driving force in human activities in the interests of the motherland.

A patriotic character can be in relation to his people, his nationality and the society and state in which a person lives. These characteristics must combine to form a single holistic feature of patriotism, since every responsible citizen of Uzbekistan perfectly understands that the interests of his family, his nation are inextricably linked with the interests of other nationalities and nationalities of our country. The patriotism of citizens of Uzbekistan expresses its "small homeland", the nature of belonging to its own nation, as well as a sense of responsibility for the whole country, for the whole of Uzbekistan.

When we look at the history of our motherland, when we are offended by its freedom, independence, our entire people have always gone to its protection.

Moral and spiritual preparation of Citizens for the protection of the motherland is one of the socio-political directions of ensuring the military independence of the Republic of Uzbekistan. Today, in order to entrust the defender of the Fatherland with the management of Modern Combat Equipment and weapons, he must first understand in depth why, for what purposes, he is doing this. It is necessary to convey to each student the presence of his family, friends, neighborhood, village-cities, as well as the presence of our Uzbekistan, which has a glorious history, great culture and immortal traditions. As such, it is also necessary to explain to readers that it is necessary to protect these riches - family, friends and homeland with a handgun when the time comes.

In order to skillfully protect the motherland on threatening days, it is necessary to prepare for this from youth. Therefore, patriotic education is carried out in public during the school period, and it will also be interesting for students. To do this, teachers who carry out such a responsible and honorable task must have thoroughly mastered its advanced modern theory and practice in order to carry out this upbringing.

Our Armed Forces are constantly replenished with young people. These young people need to Master Modern Combat Equipment and weapons in a short period of time and learn to skillfully use them.

The successes of a young soldier in the armed forces will largely depend on the goal-oriented work of the military-patriotic education system. Patriotic education is a purposeful and continuous pedagogical influence on the consciousness, psyche, will and physical fitness of the younger generation.

Patriotic education of the younger generation has always been one of the most important tasks of the modern educational system, since childhood and adolescence are considered the most optimal period for the formation of a feeling of love for the motherland.

The tasks performed by the system of military-patriotic education determine its structure. Organizationally, the components of the system of military-patriotic education are considered moral-spiritual, historical, patriotic, military-technical and physical training.

In order to establish a system for training the defender of the fatherland and increase its effectiveness, it is important to know the goals and objectives of military-patriotic education and one of the complex qualities of a person, such as shaylik, in the defense of the Fatherland.

Even so, the imagination of belonging to the defense of the motherland does not reveal all the complex aspects of this quality, its entire character. This means-it is impossible to replace the development of a feeling for protection, the formation of

Special positive qualities in a person's character, even if the motherland risks its own life. That is why it is necessary to have a holistic idea of the motherland in order to create a whole educational process that provides for the protection of the Fatherland.

In this regard, it is necessary that the organizers of military-patriotic education have a deep knowledge of general pedagogy and psychology, as well as military pedagogy and psychology. Because, as these disciplines argue, the defense of the motherland manifests a whole set of qualities of a person, such as shyness, faith, feeling, naivety, strong will, Physical Fitness and military skill.

All these qualities are inextricably linked with each other, which together form a holistic structure of shaylik to the protection of the motherland, and this is considered one of the main qualities of a person

The tasks of each direction in patriotic education are carried out in three aspects:

- to acquaint the reader with such moral characteristics as primary affection, love, care, truth and beauty;

- to make the reader understand the meaning of life and humanity, to activate his inner personal psyche;

- the formation of his own activity and a creative approach to the surrounding world.

The purpose of military-patriotic education in secondary schools:

- the formation of qualifications for the development of civic responsibility, patriotism, as well as other significant knowledge and skills in students and their active application in various aspects of the life of society.
